Education

Bachelor of Technology: Artificial Intelligence & Data Science

2023-2027

Aggregate Percentage: 68.84%

World College of Technology & Management (WCTM), Gurugram

Experience & Hackathons

National Level Hackathon 2024 - WCTM

October 2024

- Architected and pitched a functional Smart Education prototype leveraging AI concepts, designed to deliver personalized learning tracks and adaptive problem-solving modules for students.
- Accomplished full architecture setup by integrating a Django backend with optimized SQL relational models, establishing a reliable data structure to manage diverse learning needs.
- Optimized backend application response intervals, improving processing latency by 15% under intense competition pressure, by enforcing clean programming practices and eliminating redundant database calls.

Techfest 2025 — WCTM

January 2025

- Collaborated within a 4-member team as a Database Manager(member) to build and deploy an automated Intelligent Quiz Maker application designed to evaluate student understanding through dynamic, adaptive questions.
- Managed the entire relational database architecture using SQL, creating optimized schemas to handle user profiles, question banks, and real-time score tracking efficiently.

Projects

AI Resume Analyzer

Python, Django, SQL, Frontend, Git

Live Demo: ai-resume-analyzer-5kr9.onrender.com/login/

- Developed a full-stack automated intelligent resume analysis application, parsing and evaluating key metrics from user documents, by building robust data processing logic over a Django web framework.
- Designed an intuitive frontend integrated with an optimized SQL database schema, improving backend data logging efficiency by 15% through structured relational querying.

Personal Developer Portfolio

Python, Django, Tailwind CSS, Gunicorn, Git

Live Demo: my-django-portfolio-15y9.onrender.com/

- Designed and architected a production-ready, minimalist developer portfolio utilizing Django's MVC structure to showcase technical engineering competencies.
- Integrated WhiteNoise middleware to handle static asset delivery, optimizing page load speeds and asset compression directly via the web application instance.
- Configured robust deployment configurations using Gunicorn HTTP servers, successfully hosting the live application on Render cloud infrastructure with automated continuous deployment.

Achievements

Developed responsive web application projects using HTML, CSS, JavaScript, and MySQL, strengthening practical full-stack development skills.

- Successfully completed multiple academic and personal projects by applying Python, MySQL, and modern frontend technologies.
- Gained hands-on experience with Git and GitHub for version control and collaborative project management.
- Strengthened problem-solving and debugging skills through continuous coding practice and project development.

Technical Skills

- Web Technologies (HTML, Tailwind, CSS)
- SQL
- Python
- JavaScript
- MySQL
- Django Framework
- React.js

Certificates

- 40-Hour Django Backend Development** – Appwars Technologies PVT. LTD.
- Domestic Data Entry Operator** – Ministry of Skill Development & Entrepreneurship Government of India.
- WORKSHOPS & TRAININGS**
- AI/ML Workshop on ABB Arm Robot** – WCTM
- AI & Metaverse Training (1 Week)** – WCTM
